35	There is no conformational message after registration.	1. Open browser/go to URL; 2. Enter valid data in rest required fields; 3. Click on Save button	Proper conformational message is displayed.	Blank page is opened with "Create new" heading

Suggestions:

1. Optional Gender field should be present in Registration form (common in medical registration forms).

2. SSN could have explanation (new User doesn't know what SSN stands for)

3. SSN is for US citizens. If this create form is also for non-US citizens, it should have option for Users to choose their social identification (each country, or continent has their own personalized medical identification).

4. Instead of Address Information* it could be Address*.

5. Cell Phone field should be present instead of Work Phone.

6. If the registration form is also for non-US citizens, Work or Cell Phone field should have first dropdown list of countries' codes and blank field for entering phone number.
